Respected madam,

I wish to add some corrections in the present syllabus. I hope that these will be consider during next syllabus designing course.

S.Y. B. Sc. P-III

Repetition of Practical for both Sem III & IV i.e. Sources, properties and uses of : fibres, paper and spices and condiments.

Besides this the whole Unit from the same paper is repeated in both the semesters, which can be avoided.

T.Y. B. Sc.

Paper-I- there is no theory for Yeast, but it is included in the practical, it will be better if we include it in the theory. While in case of Bioinformatic practicals- these practicals not seems to be that much effective for the students in their syllabus from the Paper IV of Sem Vi. These are some observations. Please think over the same during next workshop of syllabus designing.

Thanking you

**Sub: About Syllabus of T. Y. B. Sc. Botany (Course Code USBO502 & USBO602 Paper- Plant diversity-IV)**

Respected Madam,

At present syllabus of T. Y. B. Sc. (Botany- Course Code **USBO502 & USBO602 Paper- Plant diversity-IV**) the families **Capparidaceae** and **Sterculiaceae** are for the semester-5<sup>th</sup> but flowering of these two families are generally in the months of December –April.

In the same case of about families **Scrophulariaceae** and **Graminae (Poaceae)**; presently these two families for semester-6<sup>th</sup> but the flowering these two families are generally in the months of July to November.

Therefore, you are request, if interchange the above four families from 5<sup>th</sup> to 6<sup>th</sup> semester and 6<sup>th</sup> to 5<sup>th</sup> semester then it will be supportive for practical work.

Thanking You,

With warm regards,

--
